

FIPS ZM 65

perfect small compulsory mixer for clever working

- Labour saving
- Time saving
- Universal use
- easy handling
- Thorough homegenous mixing
- No maintenance required
- Friendly to environment
- Compyct, sturdy design
- Latest safety equipment
- 230 Volt

FIPS is a light, sturdy compulsory mixer (weighing 50 kg only) with mixing apparatus to be drawn out and with a changeable plastic mixing tank of 65 l capacity.

The machine is equipped with a powerful, maintenance-free geared motor of 1.1 kW, 230 V. It is designed for approx. 50 kg mixture depending on its consistency. ZM 65 FIPS is to prepare thoroughly and steadily any thin-bodied or earthy moist materials and even sticky masses and synthetics.

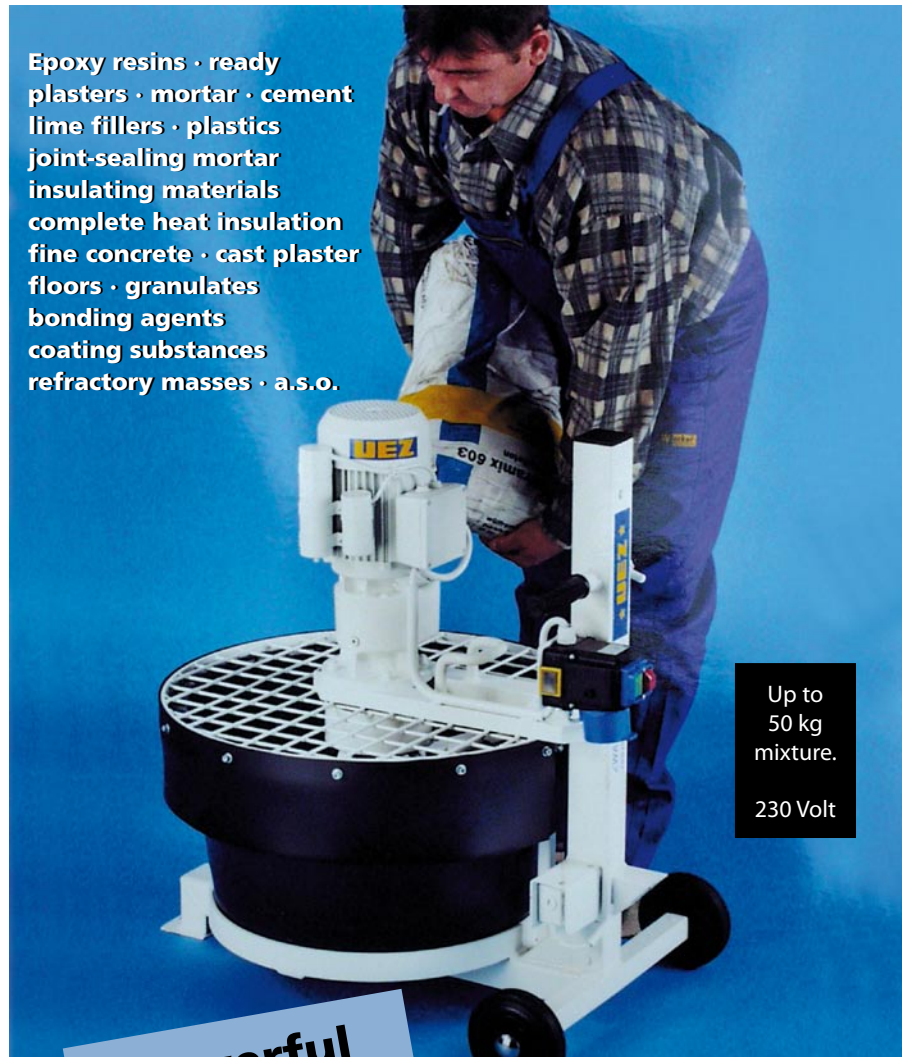

The gas-pressure spring with automatic switch off supports the draw-out movement of the mixing apparatus. Some specially adjusted mixing tools have been developed for the various materials to be treated. The filled material container can be handled on the special truck (accessory equipment). In the meantime, some other mixture may be prepared in another material container.

TECHNICAL DETAILS

| | |
|-------------------|--|
| Capacity: | 65 l plastic tank |
| Ready mix: | Depending on consistency approx. 50 kg |
| Mixing apparatus: | To be drawn out by gas spring. Universal mixing apparatus with wall wiper. Turbo mixer as accessory. |
| Drive: | 1.1 kW maintenance-free geared motor, 230 V, 7 amp. |
| Security: | Overload protection switch with plug socket, Automatic switch-off when mixer is out. |
| Speed: | Mixing apparatus 57 rpm |
| Mobile: | 2 elastic wheels |
| Maße: | L 800 mm W 800 mm H 900 mm |
| Gewicht: | 50 kg |
