TECHNICAL DETAILS :

	ZM 100	ZM 200	ZM 300
Capacity			
Mixer drum	200 l	280 l	340 l
Ready mix*	100 l	180 l	240 l
Discharge height	530 – 680 mm	530 – 680 mm	530 – 680 mm
Drive	4,0 kW	5,5 kW	7,5 kW
Dimensions L	1400 mm	1400 mm	1450 mm
W	1200 mm	1200 mm	1250 mm
H	1100 mm	1100 mm	1100 mm
Weight	210 kg	380 kg	460 kg
Electric equipment	Motor-protection switch with preselection of sense of rotation coupler socket 16 A/32 A		
Safety equipment	Automatic switch-off when opening protective grating. Discharge protection EC and GS approved		
Accessories	Dome for drum Turbo cyclone		
Reserve made to technical modifications			
* depending on material and weight			

VARIANTS AVAILABLE:

- ▶ stationary
- ▶ movable with hand draw bar
- ▶ road version 80 km/h
- ▶ electric motion/Diesel drive
- ▶ special-purpose designs by request

UEZ compulsory mixers are rapidly performing the mixing process in an intensive and homogeneous manner!

All kinds of concretes, refractory masses, floor pavements, epoxy, steel-chip reinforced concrete, granulates, mortar, clay, terrazzo, chamotte a.s.o...

Features

UEZ-four-arms mixing technique assures intensive mixing within short time.

Mixer arms spring-cushioned – mixer blades made of high-quality working material.

Low pour-in height due to vertical adjustment.

Compact and sturdy design assures secure standing.

The hand draw bar and the two solid tyres allow easy movement of the mixer. Removable hand draw bar saves cost of transportation.

Powerful drive system. No maintenance required.

Long life – high-quality materials have gone into construction.

Reversing motor-protection switch with plug box 16 A/32 A and preselector of sense of rotation.

Mixing process can be watched easily because of exposed mixer drum.

Rapid and clean evacuation.

Segmental discharge slide on drum bottom allows dosing of mix discharge.

The protective grate cover of the drum (with bag opener) is hinged and equipped with automatic switch-off device.

Rapid transportation from one building site to the other due to 80 km/h road version (trailer coupling for car and truck).

CE-conform.
