

ZM 50

60 l
Mix

Small powerful
compulsory mixer

- ▶ 16 mm grains
- ▶ Thorough mixing
- ▶ UEZ 3-arms mixing technique
- ▶ Discharge through bottom
- ▶ Variable in height
- ▶ Universal use
- ▶ Solid and compact design
- ▶ CE and GS approved

ZM 50 is a powerful, handy mixer. The UEZ 3-arms mixing technique having been most successful in thousands of applications assures steady and thorough mixing within very short time. Materials can be added easily just to the mixing drum. The mixing process can be well watched, as the mixing drum is accessible.

During the mixing operation, you may add easily any further bulk goods required. For adding binders, a bag opener is attached to the protective grate.

A segmental discharge slide on the drum bottom allows dosing of mix discharge.

ZM 50 can be moved easily without great effort on the two solid rubber tyres. Some suitable lugs are attached for handling by crane. The solid and compact version

is designed for severe everyday construction-site service. Its quality, workmanship and successful drive elements assure long life.

TECHNICAL DETAILS:

Capacity	Mixing drum 95 l
Ready mix	Depending on consistency/ material approx. 60 l
Grain	max. 16 mm at drive 2.2 kW/ 400V
Discharge	Trough segmental slide in bottom
Mixing apparatus	UEZ 3-arms mixing technique with wall wiper, reinforced mixer with wall wiper for 16 mm grains
Drive	230 V 1.5 kW A. C. 400 V 2.2 kW 3 phases A. C.
Speed	Mixing apparatus 58 rpm
Electrics	230 V motor-protection switch with plug socket 400 V with preselection of sense of rotation
Design	Mobile, height adjustable
Tyres	2 solid-rubber tyres
Safety equipment	Automatic switch-off when opening protective grating. Other safety equipment to EU standards CE and GS approved
Dimensions	L 750 mm, W 600 mm, H 1030 mm
Weight	80 kg
Reserve made to technical modifications	

Safety
setting up
standards

230 Volt
and
400 Volt

Fine concrete · refractory masses
liquide synthetics · insulating materials
epoxy mortar · cast plaster floors
terrazzo · chamotte cement
