

MIXER ZZ 50

90 kg
mixture

For thorough and lump-free mixing of
cement grouting and levelling compounds

- Best mixing quality
- Fast • Clean
- Easy handling
- Time saving

The UEZ ZZ 50 dissolver mixer mixes (disperses) thin-bodied substances fast (in about 1-2 minutes) and without lumps.

Materials may be added easily through the protective grate just into the mixing drum. A bag opener for bagged goods is attached to the protective grate. Even during the mixing process, you may add easily any further bulky materials.

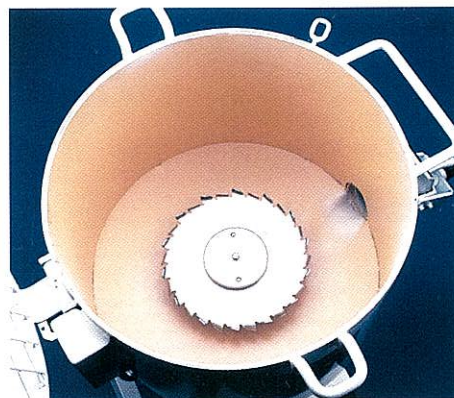

The mixing drum being accessible allows the mixing operation to be watched.

Discharge of the mixing drum through a perfection cock is well dosable. The compact and sturdy steel structure assures firm and safe standing of the mixer.

TECHNICAL DETAILS :

Capacity	Mixing drum 95 l
Mix	approx. 50 l and/or 90 kg depending on consistency
Discharge	Through bottom, perfection cocks
Mixing apparatus	Circular dissolver
Drive	2.2 kW, 3 phases A.C. geared motor, 400 V, pole changeable
Speed	Dissolver 411/823 rpm
Electrics	Motor-protection switch 16 amp.
Mobile	with 2 solid rubber tyres
Variable in height	with 4 regulating feet
Safety equipment	Automatic switch-off when opening protective grating. With dust screen, CE and GS approved.
Dimensions	L 750 mm, W 600 mm, H 1.030 mm
Weight	90 kg
Reserve made to technical modifications.
